

Dear Parents/Guardians,

It's that time of the year again – summertime! My summer math program is designed to review what we have covered this school year, using the website MobyMax. As long as students stay up with the weekly requirements, about 30-45 min a week, they should not have a huge workload. The total time working on **math** should end up being 350 minutes in all. I will be handing out usernames/passwords (they are the same for both) before the kids leave for summer vacation. For those students who enroll over the summer, you will need to make sure the office has your email so I can send the username/password to be used. There are tutorials to show how to perform the problems. Students should have work paper and pencils to be properly prepared to work.

Steps for signing in:

1. visit mobymax.com
2. go to sign in – as a student
3. click on the **books icon** (if one shows up on the screen above the Daily Challenge), which will take you to **math icon** – click on it....
4. then begin working on the lesson options that are presented

Good luck, have a great summer, see you in August!

Mr. Urtz
